

Marshall | Moya Design

October 31, 2014

To Whom it May Concern:

On behalf of Marshall Moya Design, I would like to extend a recommendation to DES DC for the design, management, and installation of loose furnishings and casework items. We have successfully worked with the DES DC team on several DC Public School modernization projects over the past few years including Leckie Elementary School and several phases of Horace Mann Elementary School.

I also worked with DES DC on Stuart Hobson Middle School, during my tenure with Whiting-Turner Contracting Co.

DES DC was instrumental in assisting with the FF&E layouts, specifications, coordination and installation of the furniture package and continues to assist with the planning process of the next Horace Mann ES phase. The Marshall Moya team enjoys working with the DES DC team, including FF&E Specialist Emily Thornton, as well as dependable project managers and skilled installers. Their knowledge and expertise in assisting with the FF&E package from start to finish is invaluable especially due to the challenging timeframes of the DCPS projects, and I would recommend their services on commercial FF&E projects.

Sincerely,

Deisy Brangman
Director of Project Management
